It sure is hot in Trinidad today. The temperature must be in the high eighties and the humidity must be close to 100%. By the time you get here the weather will be even hotter however the humidity should be lower. Don't aske me why it should get hotter during the winter because I havn't got the slightest idea.

They claim it the dry season (Winter) it won't rain for weeks on end. That sounds liek a good ??? because I'm getting tired of having rain everyday. Its raining hard right now, however I'm sure it will stop before I finish this letter.

I didn't get up until about 10 occolck this morning. After I went to the post office I actually went up to the site and did some work. I was going to help major mathis paint his boat today, however I doubt if he did much on account of this rain. I was invited to a party tonight however i don't think I'll go. About the only thing I feel like doing is going to sleep. See I havn't changed in the last two months.

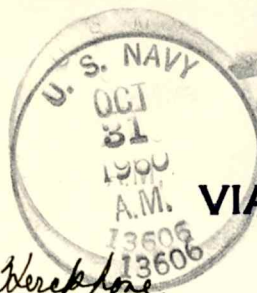

You asked when I can get off in Jan. I should be able to take ??? of any time so I'll let you set the date. OK?

By the way, Ramey AFB is in Puerty Rico. I'll probably go to Ramey to try and get back to the State. When I get to Charlston I'll check on the flight to South America, however I wouldent count on going.

Well, Sweetheart, I'm going to close for now. I'll write again tomorrow. Be good for me.

I love you very much.
